

AEM AUTHOR PORTFOLIO WEBSITE PROJECT

This project focuses on developing an Author Portfolio Website using Adobe Experience Manager (AEM).

It utilizes OOTB components and a custom Book component for dynamic content rendering.

HEADER NAVIGATION:

- Implemented as an Experience Fragment for consistency.
- Steps:
 1. Create an Experience Fragment and use the Web Variation Template.
 2. Add a navigation menu with Home, About Me, Contact Me, and Books (dropdown for categories).
 3. Publish and apply styling globally.

FOOTER SECTION:

- Provides quick access to relevant sections like About Me, Books, and Social Media.
- Steps:
 1. Add Text and List Components.
 2. Include hyperlinks for books and social media.
 3. Ensure a uniform style across pages.

HOME PAGE:

- Highlights author achievements.
- Uses Teaser Component for showcasing awards with CTA buttons.

BOOKS PAGE:

- Fetches book details dynamically using a custom Book Component.
- Structured under /content/books.

ABOUT ME PAGE:

- Displays author details using a custom component.

CONTACT ME PAGE:

- Provides contact and social media links.

TEMPLATES:

1. **Book Page Template** - Used for individual book pages.
2. **Awards Page Template** - Displays author achievements.
